NYC OTI Systems Integrator

OUR PUBLIC SECTOR CUSTOMERS

SOLUTIONS

RECENT ENGAGEMENTS

NYC Office of Chief Medical Examiner – Development of COVID 19 reporting platform on Power BI, Integration of DOH's NYCEPS application into OCME's UVIS Case Management Application and NYC Regional Health Organization to improve on missing persons response during a COVID 19 Mass Casualty Incident response during a Mass Casualty Incident. We have successfully established web services interfaces with both Healthix and the Bronx RHIO. Missing persons reports are now being harvested directly from UVIS-CMS and used to form automatic searches with the two RHIOs.

NYC Department of Social Services - Emergency COVID 19 Service Desk operations supporting over 11,000 NYC HRA & DSS employees

NYC Administration of Children Services - MDM and Device (mobile devices, tablets and laptops) provisioning for 7100 ACS case workers and DOITT employees

NYC Department of Design & Construction (NYCDDC) – Project Delivery Management System- Full implementation and system integration of a custom solution which processes various payment types using various funding sources such as Grant, Expense and Capital.

New York Police Department (NYPD)- Neighborhood Policing Application implementation across 77 Precincts on Salesforce platform

New York City Department of Education (NYC BOE) – STRIDES data integration project (Student Transportation Ridership Information & Data Enterprise Systems)- implementation of a technology solution to integrate the data between on-premises enterprise systems and VIA's AWS solution by incorporating DIIT's authentication, authorization, data governance, information security, quality assurance and compliance standards.

Department of Health and Mental Hygiene (DOHMH) Healthy Homes Program(HHP) is responsible for various initiative including Lead Poisoning Prevention. - implementation of a new system which will enable tracking of Lead Poisoning Cases through the creation of an integrated information system capable of processing relevant data from various external sources through a Case Management Workflow.
